EDUCATION

University of Houston

Bachelor of Science in Computer Science

Houston, TX

Jan. 2024 – Present

University of Texas at Dallas

Bachelor of Science in Software Engineering

Richardson, TX

Aug. 2022 – May 2023

EXPERIENCE

Automation Intern

Waukesha Pearce Industries

July 2024 – Present

Houston, TX

- Manage helpdesk operations, including ticketing, troubleshooting, and support for heavy machinery units across three company websites and several online databases.
- Provide technical assistance and communicate regularly with users to resolve issues via phone and email.
- Ensure smooth functionality and minimize downtime for critical machinery systems.
- Currently learning automation techniques to streamline support processes and improve operational efficiency.

Front End Associate

Walmart

October 2023 - July 2024

Houston, TX

- Trained colleagues on efficient use and troubleshooting of POS (Point of Sale) systems, ensuring smooth operations and reducing errors
- Provided hands-on guidance to team members in managing customer service and cart operations, emphasizing teamwork and process optimization
- Communicated effectively with diverse customers, resolving issues and delivering exceptional service under pressure
- Collaborated with cross-functional teams to enhance workflow efficiency and maintain a customer-focused environment.

Front Desk Supervisor

The University of Texas at Dallas

October 2022 - May 2023

Richardson, TX

- Managed front desk operations, including appointment scheduling, ID verification, resolving disputes, and ensuring satisfying facility use for all patrons
- Maintained cleanliness and organization of workout areas, balancing multiple tasks with attention to detail
- Fostered positive interactions with students and staff, addressing concerns and improving the overall user experience.

PROJECTS

Parsing Information Automation | *Microsoft Excel, Microsoft PowerAutomate*

August 2024

- Automated the process of parsing and submitting information to an online database using Microsoft PowerAutomate
- Organized and drew data from Microsoft Excel

Vex Robot | *Python, Scratch*

December 2021 - May 2022

- Developed autonomous movement portion for a VEX robotics competition using Scratch and Python, enabling the robot to navigate obstacles effectively without human intervention
- Designed and assembled a VEX robot for competition, utilizing problem-solving and innovative thinking to create an effective and robust structure
- Programmed motor coordination and integrated controller inputs to enhance performance during various game phases
- Contributed to the team's achievement of 3rd place in the competition, with the robot outperforming all others in the autonomous stage

TECHNICAL SKILLS

Languages: C++, Scratch, Python

Technologies: PowerAutomate, Google Workspace, Microsoft Office
